

## **Imaging Science**

**Program Description:** The Baccalaureate Degree Imaging Sciences Program is a program of study with areas of concentration in Computed Tomography/Magnetic Resonance (CT/MR) and Diagnostic Medical Sonography (DMS). The programs have a selective admission policy, which is separate and in addition to the University's admission procedure. The number of available clinical positions limits enrollment in the program. Candidates for the programs will be ranked according to grade point average in the general education courses, support courses, and radiography courses.

Students must apply for admission by the 1st Monday in April. Students are officially admitted into the programs in the following Summer II term. The program consists of thirteen months of either Computed Tomography/ Magnetic Resonance or Diagnostic Medical Sonography courses. Upon completion of the CT/MR Program and the American Registry of Radiologic Technologists (ARRT) clinical requirements, the graduate may be eligible to sit for the ARRT National Certification Examination in Computed Tomography and Magnetic Resonance. Upon completion of the Diagnostic Medical Sonography Program, the graduate may be eligible to sit for the American Registry of Diagnostic Medical Sonography (ARDMS) National Certification Examinations.

**Status:** Reviewed in March 2005
