

## **Industrial Technology**

**Program Description:** The Industrial Technology Degree Program prepares exemplary problem solvers for professional leadership roles through academic and field-based experiences. The Industrial Technology Program offers curriculum for students to obtain a Bachelor of Science Degree (BS) with emphasis on any one of the options shown in the left column. Each degree requires the student to complete a specific number of credit hours in general education courses plus core and technical option requirements.

**Status:** Reviewed in 2000 in partnership with Ashland Community and Technical College. The Department of Industrial & Engineering Technology has applied this agreement to students from other KCTCS institutions.

**Contact Person:** Ahmad Zargari, PhD  
Chair, Department of Industrial & Engineering Technology  
Lloyd Cassity 210
