What is it?

InterviewLink is an online practice interviewing system that allows students to record responses to interview questions. A pre-recorded video is played for each question, after which the student will respond using a webcam. The audio/video responses are saved and can then be reviewed and evaluated by you and/or Career Services staff.

Is it for me?

If you would like to help prepare your students for the interview process, or simply help improve their communication skills, InterviewLink may be a good fit!

What questions are available?

Our database includes more than 1,300 interview questions divided into categories such as *Creativity & Problem-Solving*, *Organization & Work Habits*, and *Communication Skills*. Interviews can include common pre-recorded questions, or you can customize your own question set. We can record the questions you would like to include, asked by you or by one of our staff members.

Will my students be able to use it?

InterviewLink is designed to be easy to use—plus, we provide a detailed instruction sheet for your students. Students simply log in to MSU Eagle CareerNet, access InterviewLink to find your question set, and record their responses online using a webcam. If a student does not have access to a webcam, he/she can come to the MSU Career Center and use one of our computers.

How do I get started?

Work with Career Services staff to customize your interview question set, and give your students a separate instruction sheet that we provide. Don't forget to incorporate the assignment into your syllabus!

We will need:

- **Your course title**

We will use this as the interview title in our system so that your students can locate the correct question set.

- **Your email address**

We will use your email address to communicate with you regarding your assignment.

Your students will need to type your email address into the system to notify you that they have completed the assignment.

- **Your list of interview questions**

We can help you choose questions from our database, or you can create your own. Some common questions include:

Tell me about yourself. Why did you choose your field of study? Describe a situation in which you've demonstrated your leadership ability.
